

18th Iranian Statistical Conference

Full Papers Booklet (English)

Table of Contents

A Comparative Performance Analysis of Structural Equation Modeling Approaches: A Monte Carlo Simulation Study	1
<i>Convergence Rates (Table 1)</i>	
A Density-Augmented Representation Framework for Improving Clustering of Nonlinear Synthetic Data	9
<i>Ahrari and Behdani</i>	
A Functional Beta Regression Approach for Analyzing Bounded Data with Derivative Information	16
<i>H. Dehnavi, et al.</i>	
A Fuzzy Spatio-Temporal Logistic Regression Model with Latent Skew- t Random Field	24
<i>Saber and Mohammadzadeh</i>	
A Hybrid Control Chart Based on CUSUM and Double Moving Average	32
<i>Moradi-Tavalleai and Salehi</i>	
A Hybrid FCNN–LSTM Framework for Sequential Prediction with Application to Air Pollution Forecasting	40
<i>Pak and Makhdoom</i>	
A Machine Learning-Driven Framework for the Implementation of Statistical Population Registers: A Hybrid Intelligent Approach	48
<i>Short Authors' Names</i>	
A Monte Carlo EM Algorithm for Fitting ARMA Models to Censored Time Series	58
<i>Mardani-Fard et al.</i>	
A Novel Approach for Statistical Shape Analysis Using the Square Root Velocity Function Representation	67
<i>A Novel Approach for Statistical Shape Analysis Using SRVF</i>	
A Review of Smooth Estimation of the Cumulative Distribution Function under Judgment Post Stratification	75

A Robust Computational Framework for Time Series Clustering with Skewed Distributions	85
<i>Robust Time Series Clustering</i>	
A Robust FSVM-GARCH Framework for Imbalanced Time Series Data	95
<i>Rashidi Alavijeh et al.</i>	
A Similarity-based Method for Saving Runs in Factorial Experiments	103
<i>Motavaze, M.</i>	
An Adaptive Hybrid Active-Passive Learning Strategy for Statistical Representativeness: A Case Study of Breast Cancer Diagnosis	110
<i>Moradi and Kasani</i>	
An unified view of probabilistic inference under incomplete information: Maximum Entropy and Bayesian Updating	118
<i>Corresponding Author:</i>	
Analysis of Persian Legal Document Networks Using Complex Network Techniques and Natural Language Processing	120
<i>M. Farhadishad & M. Khansari</i>	
Analysis of social network Facebook comments using ML, Deep Learning, and lexicon-based	131
<i>lexicon-based approach:</i>	
Application of Best Linear Unbiased Prediction (BLUP) in Stability Analysis and Genotype × Environment Interaction Studies	140
Asymptotic Power Analysis for Testing Points of Impact under Brownian Motion Predictors	150
<i>Alireza Shirvani Corresponding Author:</i>	
Bayesian Estimation for the GIKw-Rayleigh Distribution under Various Loss Functions	161
<i>Dr. Nahid Sanjari Corresponding author: nsanjari@alzahra.ac.ir</i>	
Bayesian Inference and Tracking of System Reliability	178
<i>Ganji and Gharari</i>	
Bayesian Inference for Matrix-Variate Gaussian Distributions: Theory, Computation, and	

Applications	186
<i>Gibbs Sampler for Matrix-Variate Gaussian Model</i>	
Bayesian Inference for VAR-GoGARCH Models under Gaussian and Skew-Normal Innovations	194
<i>Manouchehri et al.</i>	
Bayesian Local Sensitivity to Non-ignorability with General Missingness of Outcomes and Covariates	202
<i>E. Momeni Roochi</i>	
Bayesian Parameter and Reliability Estimation for a Bivariate Weibull Distribution: Parallel System	210
<i>Parameter Estimates</i>	
Bayesian Structure Learning of Gene Expression Networks via Laplace-Approximated Scoring: An Application to TCGA Breast Cancer Data	218
<i>Nazari et al.</i>	
BehaveSeg: A Behavior-Aware Multi-Algorithm Framework for Intelligent Customer Segmentation	227
<i>Mozayan, Mirhossieni and Zarepour</i>	
Beyond 1D Heuristics: Temporal-Causal Calibration and Multivariate Non-Parametric Hypothesis Testing for Uncertainty Quantification in Retrieval-Augmented Language Models	231
<i>S. Nazeri, Dr. F. Gorji</i>	
Bivariate Quantile Regression Analysis for Longitudinal Cardiovascular Risk Factors	243
<i>Tourani-Farani, F., Kazemi, I.</i>	
Cardiovascular Diseases classification using machine learning models	251
<i>Azarnavid, Emami, Abdolhosseinzadeh</i>	
Comparative Analysis of Bayesian Estimators for the MOAP-IL Distribution under Different Loss Functions	261
<i>N.Sanjari Farsipour,Fatemeh Mahdioun</i>	
Comparative Evaluation of Regression Kriging and Smoothing Splines for Spatial Prediction of Soil Zinc Contamination	269
<i>Root Mean Square Error (RMSE):</i>	

Comparative Evaluation of Synthetic Medical Data Generation Methods in Pediatric Osteopenia	273
<i>R.Yousefi, M.Attarhoseini</i>	
Construction and Analysis of a Nonstandard Finite Difference Scheme for Stochastic Partial Differential Equations	281
<i>M. Namjoo, M. Aminian, and M.Karami</i>	
Covariance Estimation Strategies in Massive Spatial and Spatial-Temporal Data	290
<i>A.M. Mosammam</i>	
Deep Learning Helping to Realize Masnavi-e Maanavi	298
<i>Golalizadeh and Monazami</i>	
Deep Learning–Based Competing Risks Survival Analysis for Predicting Cause-Specific Mortality in Heart Failure Patients	306
<i>deep learning (DL)</i>	
E-Bayesian Estimation for Exponential Distribution under Progressive Type II Censoring with DeGroot Loss Function	318
<i>MirMostafae and Ghasabani</i>	
E-Bayesian Estimation for the Lomax Distribution Under the Precautionary Loss Function Based on Record Values	326
<i>MirMostafae</i>	
Effective Analysis of Genetic Diversity of Plant Species through Artificial Intelligence Tools	334
Efficient Bayesian Inference for Stress-Strength Reliability in Gompertz Distribution via Ranked Set Sampling	342
<i>Z. Karimiezmareh</i>	
Efficient MCP-Penalized Variable Selection for Time-Dependent Cox Models with Counting-Process Data	350
<i>Ramezani, Rabiei, Arashi</i>	
EndSurvGAN: End-to-End Survival-Aware Generative Modeling of Censored Time-to-Event Data	358
<i>Z.Esfandiar</i>	

Enhanced Bivariate FGM Copulas for Accurate Dependency Analysis	366
<i>H. Bekrizadeh</i>	
Enhancing Decision Tree Learning via Conditional Cumulative Residual Entropy: A Framework for Continuous Variables	373
<i>S. Abolhosseini, M.Khorashadizadeh</i>	
Entropy in Inflated Count Data: A Comparative Analysis	381
<i>Farhadian, R. and Lorvand, H.</i>	
Estimating the Stress-Strength Parameter Using a Dirichlet Process Mixture Model with Burr XII Kernels	386
<i>Haji Joudaki</i>	
Estimation of the Mean Residual Life Function Using Neoteric Ranked Set Sampling .	394
<i>Jabari and Zamanzade</i>	
European option valuation with modified Heston model under stochastic market liquidity	402
<i>P.Yahyavi, N.Modarresi</i>	
Evaluating Large Language Models on the Iranian University Entrance Exam: A Multi-Subject Persian Benchmark	409
<i>S. Kheirabadi, M. H. Zahedi</i>	
Evidential sets for the circular normal distribution	417
<i>Sarvari, Doostparast and Emadi</i>	
Expectation-Maximization Algorithm for Efficient Optimization of Multi-Response Bridge Regression	425
<i>Rozhina Masoudi ^{^1} , Amir Hossein Ghatari Corresponding Author:</i>	
Extropy of the Residual Lifetime of Alive Components in Coherent Systems	433
<i>The Residual Lifetime Variable ($T_{j,n}$)</i>	
Feature Ranking and Incremental Selection for High-Dimensional Classification	441
<i>D</i>	
Fuzzy Bayesian Inference with Soft Sets	451
<i>M. A. Dehghanizadeh</i>	
Generalized H	461

Hazhir Homei, Alireza Hedayati, Maryam Kamali Alamdari

Graph Feature Extraction for Path Planning Using Machine Learning by SVM and GNN
470

Abdolhosseinzadeh, Emami, Azarnavid

Graphical Finite-Population Sampling with Adaptive Monte Carlo Tree Search 479

Panahbehagh and Mohebbi

Grey Relational Analysis: A Statistical Approach to Measuring Dependence in Data-Poor Conditions 486

Mohamad Ahmadian $\wedge a \wedge \setminus \}$

High-Resolution Spectral Estimation of Univariate and Multivariate Stationary Time Series 494

Truncated (Rectangular):

Hypergroups-Based Modifications of a Traditional Clustering Algorithm for Heterogeneous Big Data Analytics 507

M. A. Dehghanizadeh

Information Loss in Spatial Statistics Analysis: Entropy, Scale, and Uncertainty 516

Short Authors' Names

Intelligent Anomaly Detection with Deep Reinforcement Learning for Industrial Inspection
518

Khadivi Noghredek et al.

Investigating the Relationship between Iranian Insurance Companies' Solvency Ratio and Insurance Policy Sales 526

R. Mahmoudvand

Jackknife Ridge Estimation in Linear Mixed Models with Measurement Error 534

Shirvani, Rasekh and Babadi

Joint Modeling of Zero-Inflated Longitudinal Count Data and Survival Outcomes with Cure Fraction 543

S. Souri Pilangorgi, S. Khodakarim and Z. Shayan

Joint Parameter Estimation in the Pareto Model under Type-II Censoring: A Bayesian Approach 553

Asgharzadeh, Saadati Nik

Kernel Density Weighted Twin SVM: A Robust Approach to Noisy Data	560
<i>E. Eshaghi, M. Arashi, J. A. Nasiri</i>	
Least Angle Regression for Identifying Potential Predictors of HbA1c in Type 1 Diabetes: A Real-World Data Application	567
<i>Safari E, Esmaily H, Shabani N</i>	
Likelihood-Based Evidential Comparison of Classical Goodness-of-Fit Tests	575
<i>F. Yousefzadeh</i>	
Liu-type estimators for the Elliptical SUR Model	583
<i>Morteza Amini ^1 Corresponding Author (Email: morteza.amini@ut.ac.ir</i>	
Machine Learning Methods for Bivariate Integer-Valued Time-Series Data	591
<i>Pezeshkian and Sharafi</i>	
Maximum likelihood estimation of length-biased censored data under Frank copula dependency	595
<i>Short Authors' Names</i>	
Method for Estimating Genotype Stability, Adaptability, and Environmental Discrimination in Plant Breeding Programs	602
Mixed-Effects Hurdle Trees for Longitudinal Zero-Inflated Count Data	611
<i>Step 0: Initialization</i>	
Mixture modeling of normal mean-variance Birnbaum-Saunders factor analyzers under a Bayesian framework	619
<i>F. Hashemi and F. karimi</i>	
Moving Extreme Ranked Set Sampling for Imbalanced Binary Classification: A Logistic Regression Perspective	631
<i>R.Yousefi, H.Doosti,H.Esmaily</i>	
Multilevel Analysis of Misclassified Binary Outcomes: Validation-Data-Based Approach Adjusting for Covariate Measurement Error	639
<i>Ahangari, M., Gotalizadeh, M., Rezaei Ghahroodi, Z.</i>	
Multivariate Tail Conditional Expectation Under a Linear Constraint: A New Risk Measure for Aggregated Exposures	648

Nonparametric Bayesian Optimal Design for Exponential-Shift Regression Model with stick breaking method and uniform distribution as the base measure	658
---	------------

Short Authors' Names

On a Novel Weighted Multivariate Normal Distribution Using Mahalanobis Distance .	666
--	------------

Medical Imaging and Anomaly Detection:

On Stress-Strength Reliability for a Discrete Pareto-like Distribution	673
---	------------

D. Farbod and M. Basirat

On the Asymptotic Properties of Liu Estimator	681
--	------------

M. Roozbeh

On the Probability Generating Function of Discrete Distribution Generated by Cauchy Stable Density	690
---	------------

D. Farbod

On the Zero-Inflated Geometric INAR(1) Process with Random Coefficient	697
---	------------

Sieve Bootstrap Estimation

Optimal Designs under a Proportional Interference Model with Nonnegative Proportionality Constant and Correlated Observations	707
--	------------

R. Khodsiani

Optimal lot reinspection based on truncated life test for logistic Rayleigh distribution .	714
---	------------

Naghizadeh Qomi

Optimal plan under Type-II Censoring Schemes in Multi-component Stress-Strength Reliability based on its Estimate and Cost	722
---	------------

Ghafouri and Basiri

Order Statistics in R: Moment Computation, Goodness-of-Fit Assessment, and Statistical Inference with the mos	730
--	------------

M. Salehi and R. Arafteh

Ordered Ranked Set Sampling for Progressive-Stress Accelerated Life Tests under Type-II Censoring	738
--	------------

N. Hakamipour

p.1066	746
-------------------------	------------

Parameters Estimation of the Lomax-Lindley Distribution Utilizing Record Data	755
<i>B.Tarvirdizade</i>	
Performance of the auto.arima() Function in Recovering True ARIMA Models Order Under Three Different Stationarity Tests	763
<i>M. Heidari</i>	
Periodic Splines, SARIMA, and Frequency-Domain Analysis: A Comparative Study Using the Arosa Ozone Dataset	767
<i>Dr. Roshanak Alimohammadi ^{^1}, Azam Imani ^{^2} i.azam48@gmail.com ^{^1} Department of Statistics, Alzahra University, Tehran, Iran ^{^2} Department of Statistics, Alzahra University, Tehran, Iran</i>	
Predicting Competitive Bidding Behavior Under Uncertainty Using Scenario-Informed Machine Learning	773
<i>Mahshad Arabi and Mohammad Rahim Eivazi</i>	
Semiparametric Weibull Modeling for Constant Stress Accelerated Lifetime Tests using P-spline Neural Networks	787
<i>B. Sedighi, E. Khorram, A. Aghamohammadi</i>	
series Explainable Ensemble Learning for Software Defect Prediction [4pt] Using Fuzzy Integral-Based Aggregation	795
<i>Parviz Ghorbanzadeh</i>	
Shrinkage Bayes Estimation for Matrix-Variate Normal Mean Matrix under Balanced Loss Function	801
<i>H. Karamikabir</i>	
Shrinkage Estimations of Semi-parametric Models for High-Dimensional Data in Finite Mixture Models	809
<i>Soghra Rahimi; rahimi_s@atu.ac.ir and Farzad Eskandari; askandari@atu.ac.ir Department of Statistics, Allameh Tabataba'i University, Tehran, Iran</i>	
Spatial Multi-Objective Optimization for Efficient Rain Gauge Network Design in Khuzestan, Iran	830
<i>Mohammadzadeh and Lotfian</i>	
Stein Estimators in Right-Censored Zero-inflated Bell Models	840
<i>Z. Zandi, H. Bevrani, K. Kamary</i>	

Stochastic Anchor Points in Multiobjective Optimization	847
<i>Javad Koushki</i>	
Stochastic Hypergroups and Applications in Statistics	852
<i>M. A. Dehghanizadeh</i>	
Stress-strength reliability analysis under partially accelerated life testing using the inverse Weibull distribution	859
<i>F. Hashemi</i>	
Stress–Strength Reliability with Clayton Copula and Generalized Rayleigh Marginals	867
<i>Yarahmadi et al.</i>	
The Asymmetric Laplace Process: A Powerful Alternative to AL in Spatial Quantile Regression	875
<i>S. Khademhosseini and F. Rivaz</i>	
The Bayesian nonparametric Estimation of entropy and extropy based on right censored data	883
<i>Marani & Saberi</i>	
The Critical Role of Feature Engineering in Time-Series Prediction: A Case Study on Air Pollution Forecasting	893
<i>Pak and Kaviani</i>	
The Ising spin model on the square grid system based on Boltzmann distribution	901
<i>M. Shams and M. A. Mirzaie</i>	
Time-Dependent Cumulative Past Fisher Information: $\mathcal{V}$ Bounds, Orderings, and Mixture Representations	909
<i>Sharafi and Kharazmi</i>	
Two-Parameter Ridge Estimation in Seemingly Unrelated Regression Models	917
<i>Mehdizadeh Esfanjani et al.</i>	
Weighted Total Variation Distance for Copula-Based Dependency Analysis	925
<i>Mohammadi et al.</i>
